PROFESSIONAL SUMMARY

B.Com graduate with hands-on experience in financial data analysis, reconciliation, and FP&A reporting. Delivered 98%+ data accuracy and reduced reporting errors by 40% through advanced Excel and Power BI dashboards at Cesno. Proficient in variance analysis, SQL, and financial modeling. Seeking a Junior FP&A / Financial Analyst role to support data-driven decision making in a fast-paced environment.

EDUCATION

B.Com (Computer Applications)

June 2022 – June 2025

Indian Institute of Management and Commerce, Hyderabad | CGPA: 8.09/10

Relevant Coursework: Financial Accounting, Cost & Management Accounting, Corporate Finance, Financial Management, Auditing & Assurance, Taxation, Business Law

WORK EXPERIENCE

Data Analyst Intern | Cesno

June 2025 – Dec 2025

- Reconciled large financial datasets in Excel, achieving 98%+ accuracy and reducing monthly reporting errors by 40%.
- Developed interactive Power BI dashboards tracking revenue KPIs, cost trends, and performance metrics — enabling senior management to make faster, data-driven decisions.
- Prepared quarterly financial exhibits, variance reports, and MIS summaries that supported executive-level financial review and planning

Cloud & Infrastructure Analyst | LTIMindtree

Feb 2026 – Present

- Deployed onto PSE production client environment after clearing all compliance and benchmark assessments, demonstrating ability to perform under strict SLA and regulatory frameworks.
- Monitored operational data, identified anomalies, and escalated issues with documented recommendations — mirroring financial controls and risk reporting processes in banking environments.
- Maintained accurate daily logs, timesheets, and process documentation in line with enterprise compliance standards.

RELEVANT PROJECTS

Financial Analysis Dashboard | Excel

- Designed an end-to-end P&L dashboard tracking quarterly revenues, expenses, profit margins, and departmental cost variances using PivotTables, VLOOKUP, slicers, and conditional formatting.
- Simulated budget-vs-actuals and variance attribution analysis — directly applicable to financial planning and analysis (FP&A) workflows in banking.

Retail Sales & Transaction Analysis | SQL

- Analyzed large transaction datasets using advanced SQL joins, aggregations, and subqueries to identify revenue trends and flag data anomalies.

Investment Performance Dashboard | Power BI

- Built an investment tracking dashboard for 10 stocks using DAX measures to visualize returns, sector allocation, CAGR, drawdown, and Sharpe Ratio for performance evaluation.

SKILLS
